

**Tribal Pesticide Program Council
Full Council Meeting, October 14-16, 2025**

Evaluation Summary

Was the agenda for this meeting adequate and did it meet your expectations?

- Yes on both accounts
- Yes, it did and it sparked very good conversation
- Yes, feel like important topics were covered.
- Yes
- yes

What could the TPPC meeting planners have done to make this meeting more useful to you?

- Nothing, you did well Mark.
- Nothing, well put together, and location was excellent as well
- Planning was great and location as well.
- N/A
- Planners did amazing given the last minute changes with EPA

For future meetings, please suggest topics / speakers who you feel could help improve the agenda.

- I would love to hear from a Tribe supported by a circuit rider regarding how their Tribe decided to go that route and how effective they feel that program is. Do they plan to continue to build capacity for their own program or are they content with the circuit rider program? Maybe a Q/A with leadership from participating tribes, moderated by a non circuit rider.
- Pollinators presentations, more on Endangered species, and more in-depth drone talks
- I think topics and speakers did the best that they could to attend. In person speakers are always better but due to the restrictions that was not possible.
- What's done agriculturally beyond pesticide inspections, does anyone have to tackle issues that may overlap into other departments? Maybe more about drones and tech advancements beyond new formulations and labels. For ex. we have CAFOs that aren't pulling permits and are growing feed on their lot, so how do tribes get landowners to listen w/o internal enforcement and with a state that has such limited capacity that no one can do more than fine offenders.
- Toxicology on environmental fate and transport of pesticides

How will this meeting strengthen your capability to better implement your program?

- As always, hearing the current state of the EPA is useful to strategize future goals and support planning.
- The work connections that were made, the availability of how other tribal pesticide programs are willing to help out with QAPPS, Inspections.
- Having tribes to work on a pesticide code to serve their tribes so laws can be enforced and benefit the pesticide issues.
- It generally reinforces the feeling of support from neighboring tribes and shows you many creative ways to solve problems and make connections.

- Helps guide the work. Learn what other tribes are doing or have done. Learn what works/what doesn't. Keeping up to date on changes in products and regulations

Please comment on the customer service provided by ITEP.

- Mark does well, we're fortunate to have him support the TPPC.
- Top notch
- ITEP has always done a great job serving the TPPC meetings. Mark's work, support, and efforts are very much appreciated.
- Everything's been smooth so far, just waiting on the reimbursement check now!
- ITEP is great to work with. They are professional, on task, and a tremendous asset to the TPPC
